Choose Foods To Support Healthy Gums

These foods support gum health while improving your overall health!

Milk and cheese contain casein – believed to neutralize acid from plaque bacteria.

Celery and spinach take a lot of chewing, which stimulates saliva production to neutralize bacteria.

Ginger root fights inflammation and helps promote healthy mouth tissue.

Apples cleanse your teeth and provide Vitamin C to help with healing your gums.

Water will help wash away food debris and the bacteria that causes decay and gum disease. Go grab some right now!

Give It Your Best

The importance of regular care

Growing bodies of research tell us that poor oral health and pancreatic cancer are linked. While research continues to investigate whether oral bacteria *causes* pancreatic cancer or if it serves as a *marker* for the disease, the great news is that improving your oral health can *reduce* your risks.

Three things you can do today to improve your oral health and reduce the risk for cancer and other associated health issues...

1. Brush for 2 minutes twice per day
2. Clean between your teeth daily with floss or other interdental tools
3. Schedule & attend regular professional teeth cleanings.

Periodontal (gum) disease is a preventable inflammatory disease caused by a buildup of plaque on your teeth and gums. With so many links to systemic diseases like cancer, heart disease, Alzheimer's, osteoporosis, and more, an ounce of prevention really is worth a pound of cure!

Don't delay. Call today to schedule your family's preventive dental appointments!

No Need For Misery, Men!

We're here for you!

We hate to see anyone suffer ... whether you are in pain or enduring a smile damaged by advanced decay, gum disease, or unaddressed trauma.

If you are facing the ordeal of losing teeth or if you need some repairs, you're likely braving pain, swelling, and infections, and probably missing time from work. These untreated tooth problems never get better – they just worsen.

Let's eliminate today's issues, intercept future discomfort, and work together on prevention. We really care about you and your family and want you to be in the best health – and comfort – you can be!

P.S. Please share this with the men in your life ... they're much more likely than women to skip or delay appointments!

We Will Calm Your Fears

Are you fearful of dental visits? Do you tend to avoid or cancel appointments? Well, a lot of people feel the same way and do the same things.

Our team is specially trained to help you and can offer numerous solutions that will ease your anxiety. First things first though...

Share your apprehension with us so we can tailor a strategy to help you feel safe, in control, and even relaxed. We want to ensure you receive the oh-so-important dental care you want and need.

Invisible Benefits

Consider white fillings

How can you benefit from virtually invisible filling material when your silver-colored ones need replacing?

- **aesthetics** – they match your natural teeth and are virtually undetectable
- **strength** – composite fillings bond directly to the tooth, insulating the tooth from extreme temperature changes and strengthening the tooth to withstand biting pressure
- **minimally invasive** – less removal of healthy tooth enamel is required so the filling is smaller than silver-colored ones
- **accurate fit** – effectively seals out bacteria.

Protect Yourself

Sobering oral cancer statistics

Historically, oral cancer patients were mostly age 40+. Now it's on the rise in younger patients. Known risk factors are tobacco (smoke and smokeless), excessive alcohol consumption, type 2 diabetes, and the oral human papilloma virus (HPV).

As oral cancer can prosper without pain or symptoms, check your gums, lips, cheeks, tongue, palate, tonsils, and throat monthly for...

1. White or red patches
2. Tissue changes
3. Longtime voice hoarseness
4. A canker that doesn't heal after 2 weeks
5. Difficulty swallowing, speaking, or chewing.

ANY CONCERNS? ALWAYS ASK US!

BOOM!

What a change!

Many patients who have had cosmetic dental treatment gain the confidence to pursue careers, and even relationships, that never seemed possible before. Here are some procedures that are available to improve your smile.

Teeth Whitening – We can design and supervise a whitening program for you to lighten stained, discolored, or dull teeth.

Tooth-colored restorations – Natural-looking porcelain or composite resin restorations replace old failing fillings.

Crown & Bridge – Porcelain crowns support and restore severely damaged teeth. Bridges are an excellent option to replace missing teeth.

There's no need to be satisfied with anything less than your best and brightest smile!

Come see us for a smile consultation.

Tonight's Entrée: Lemon Garlic Shrimp!

All The Ingredients...

2 tbsp butter	1 tsp red pepper flakes
1 tbsp olive oil	Juice of one lemon
1 lb shrimp (peeled/deveined)	2 tbsp dry white wine (or water)
3 cloves garlic, minced	Chopped parsley

...For A Fabulous Dinner!

1. In a large skillet over medium heat, combine butter & oil
2. Add shrimp, garlic, red pepper flakes & cook until shrimp is pink
3. Remove from heat & stir in lemon juice, wine, & parsley.

Serve over rice & enjoy!

CEREC Smiles

Natural, strong,
and fast!

We're proud to offer *CEREC*[®]; the world's most advanced dental restoration system. With it, we can manufacture lifelike porcelain crowns, veneers, inlays, and fillings right here in our office during only one visit.

CEREC technology allows us to take a picture of the damaged tooth. Our ability to design your restoration is optimized by realistic digital images that are used to accurately and precisely mill the restoration. Our final step? Bonding your finished restoration in place.

The strong ceramic material matches your tooth color, looks like natural enamel, and is biocompatible.

One-visit dentistry

CEREC could transform your smile! Please call for a consultation!

Digital scans replace uncomfortable gagging impressions

iTero[™] *Digital Impression System* - an alternative to the traditional impressions used to make crowns, bridges, veneers, implants, and Invisalign! Instead of these impressions, we will take 'pictures' of your teeth and gums so that a model can be made - no more goop!

You're invited to call **(862) 377-6350**
